

DANCE

CD 2: TRACK 20

Making a robot

Face your partner and hold hands.

Pretend you are sawing something so your arms go backwards and forwards.

Stop sawing and clap your hands, then slap your partner's hands.

Turn around away from your partner and walk like a robot around the room.

Do not speak. Keep legs and arms stiff.

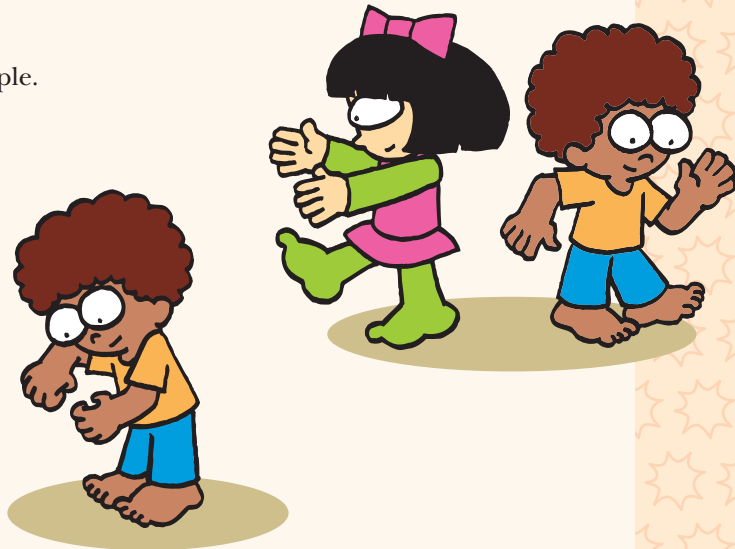

Pretend to be a good robot that helps people.

Can your robot pour a drink of water?

What else can your robot do?

Time to turn the robots off for today

That was great, I especially liked the stiff movements that Kaia made

RESPONDING

Did your robot have a name? What was it?

What did your robot look like?

Students can draw a picture of their robot.
